TWINS

The unconventional subway tiles

Twins è la nuova collezione di piastrelle in tinta unita per rivestimento d'interni ed esterni in gres smaltato ingelivo con struttura in bassorilievo.

La collezione s'ispira allo stile urbano degli inizi del Novecento, dove le piastrelle "diamantate" erano comunemente utilizzate per rivestire i lunghi corridoi delle stazioni metropolitane delle più grandi città.

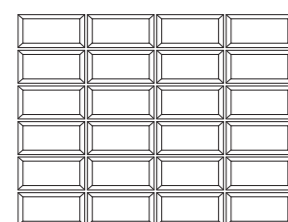

La superficie, con struttura diamantata inversa e lucida, è molto sensibile a ogni fonte luminosa, assumendo riflessi e sfumature di colore diverso a ogni variazione di luce.

I dodici colori della collezione riprendono tonalità classiche della cultura industriale in aggiunta a tonalità di accento.

Nell'accoppiamento di cromatismi e di composizioni, Twins tiene fede al suo nome e genera un gemellaggio inedito e sorprendente di materia e di colore.

Il formato 5x10 cm, nei tre schemi di posa proposti, ortogonale, sfalsato e a cassettoni moderni, sono disponibili già montati su rete, diventando reale elemento di decorazione per ambienti residenziali ed extra residenziali evocando il fascino intramontabile del total look metropolitano.

POSA C

Twins is the new tile collection in plain colors for indoor and outdoor coverings in frost-proof glazed stoneware in bas-relief structure.

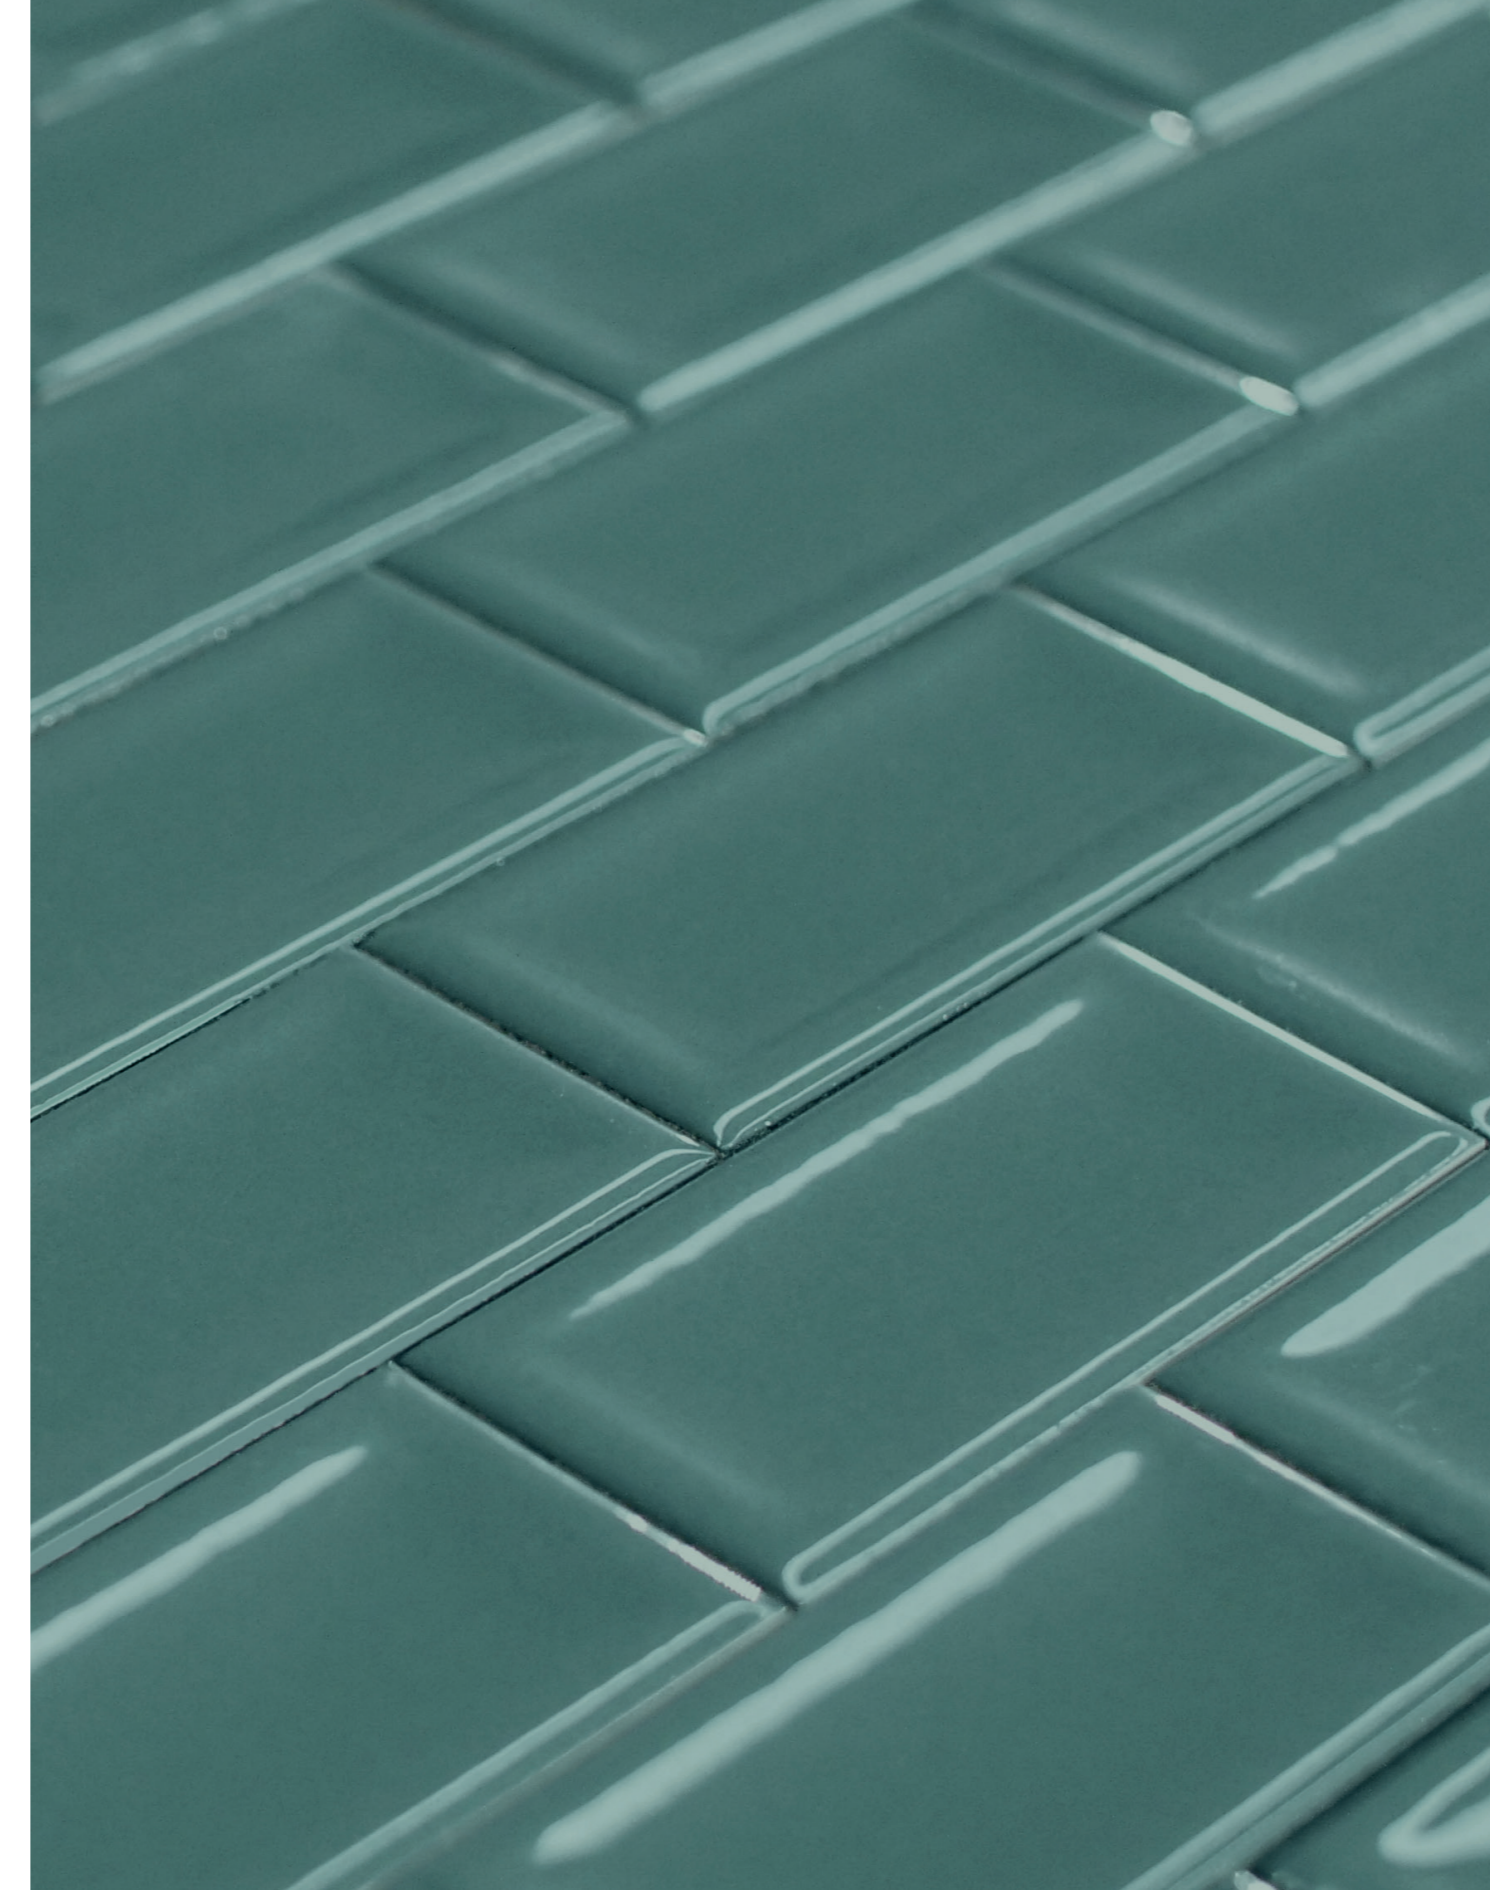

The collection is inspired by the urban style of the early 1900s, when diamond tiles were commonly used to cover the long corridors of subway stations in major cities.

The surface of the brilliant inverted diamond structure is very sensitive to any light source, providing different reflections and shades with each change of light.

The twelve colors in the collection are reminiscent of the classic shades of industrial culture in addition to bold colors.

In the combination of colors and compositions, Twins stays true to its name and offers an unusual and surprising twinning of materials and colors.

The 5x10 cm format is offered in three patterns: orthogonal, offset and modern coffered; available in mesh-mounted, becoming a true decorative element for residential and commercial settings with the timeless charm of the total metropolitan look.
