L'extraordinaire procédé de production 3D Digital Application Technology reproduit sur le grès cérame d'incroyables effets visuels et tactiles. Réalisés par technique numérique, les étonnants reliefs suppriment les limites de variabilité et se synchronisent parfaitement avec l'application des couleurs.

Der innovative Herstellungsprozess 3D Digital Application Technology ist in der Lage, erstaunliche visuelle und haptische Eindrücke auf Feinsteinzeug zu übertragen. Die lebendigen Reliefs, die digital erstellt werden, bieten eine grenzenlose Variabilität und sind perfekt mit der farblichen Applikation synchronisiert.

The innovative 3D Digital Application Technology manufacturing process transfers incredible visual and tactile effects on the porcelain stoneware. Vibrant digitally produced reliefs now come in limitless variants and are perfectly coordinated with the applied colours.

L'innovativo processo produttivo *3D Digital Application Technology* trasferisce sul gres porcellanato incredibili traguardi visivi e tattili. I vibranti rilievi realizzati digitalmente non pongono più limiti di variabilità e sono perfettamente sincronizzati con l'applicazione cromatica.

## PERFECT FUSION OF COLOUR AND 3D STRUCTURE.

NovaBell's 3D technological process involves an initial digital application of glues and grits on the planar surface followed by a second, coordinated application of coloured glazes.

**The end result is a perfect fusion of three-dimensional surface and colour, resulting in unparalleled realism.**

Il processo tecnologico 3D di NovaBell prevede una prima stesura digitale di colle e graniglie sulla superficie planare seguita da un secondo passaggio sincronizzato di smalti colorati.

**Il risultato finale è quello di una perfetta fusione tra superficie tridimensionale e colore, che dà vita ad un realismo ineguagliabile.**

La technologie 3D de NovaBell prévoit en premier l'application numérique de colles et granulats sur la surface plate, puis l'application synchronisée d'émaux colorés.

**Le résultat final est une fusion parfaite entre surface tridimensionnelle et couleur pour donner corps à un réalisme hors pair.**

Der technologische 3D-Prozess von NovaBell sieht einen ersten digitalen Auftrag von Kleber und Kies auf der ebenen Oberfläche und dann ein zweites synchronisiertes Finish mit farbigen Glasuren vor.

**Das Endergebnis ist eine perfekte Verschmelzung zwischen der dreidimensionalen Oberfläche und der Farbe, welche einen unvergleichlich realistischen Eindruck entstehen lässt.**

# BETTER NATURE.

**3D DAT technology makes it possible to evoke every detail of natural stone and to transfer it to the entire ceramic surface.** The colour shades and gradations follow the three-dimensional structure, which emphasises the changing shadows and light on the material. NovaBell's unrivalled technology has optimized the original materials' mimetic qualities, reproducing, with a hyperrealistic effect, harmonious morphological and chromatic details found in nature.

**La tecnologia 3D DAT permette di rievocare ogni minimo dettaglio della pietra naturale e di trasferirlo in tutte le parti della superficie ceramica.** Le tonalità e le gradazioni di colore seguono l'andamento tridimensionale che enfatizza ombre e luci della materia in movimento. L'insuperabile tecnologica NovaBell ha ottimizzato la capacità mimetica dei materiali originali, riproducendo con iperrealismo gli armoniosi dettagli morfologici e cromatici presenti in natura.

**La technologie 3D DAT permet de reproduire le moindre petit détail de la pierre naturelle pour le transférer tel quel sur la céramique.** Les tonalités et les nuances de couleur suivent l'évolution tridimensionnelle qui met en valeur les ombres et les lumières de la matière en mouvement. La technologie imbattable de NovaBell permet d'imiter encore mieux les matières d'origine, en reproduisant avec un très grand réalisme les harmonieux détails morphologiques et chromatiques de la nature.

**Mit der 3D DAT Technologie können selbst kleinste Details des Natursteins nachempfunden und auf sämtliche Teile der Keramikoberfläche übertragen werden.** Die Farbtöne und -abstufungen folgen der dreidimensionalen Struktur, die Schatten und Licht der in Bewegung befindlichen Materie intensiv zur Geltung kommen lässt. Der unübertreffliche technologische Prozess von NovaBell optimiert die Tarnfähigkeit der Originalmaterialien und gibt die in der Natur vorkommenden harmonischen morphologischen und farblichen Details auf hyperrealistische Weise wieder.
